

PROVEN IDENTITY BY **PRECISE BIOMETRICS**

We are committed to delivering fingerprint recognition solutions that are secure, fast and reliable. More than replacing PINs, passwords and keys – we provide a proven identity, which enables our customers to increase security and cost-effectiveness, while protecting user integrity.

PRECISE BIOMETRICS' CUSTOMERS

Together with partners, we deliver fingerprint solutions to countries and international government agencies, as well as local businesses and global corporations.

Throughout the years, we have won some of the world's largest projects combining fingerprint and smart card technology. These are some of them.

- US Federal Agencies
 - Department of Defense
 - Department of Homeland Security
 - Department of State
 - Department of Treasury
- US State Governments
- EU and local European Governments
- National ID Card programs
 - Thailand National ID Card
 - State of Qatar National ID Card
 - Portugal Citizen Card
- Travel & Transportation solutions
 - Scandinavian Airlines
 - Bornholmstrafikken
- Banking & Finance

PRECISE BIOMETRICS' TECHNOLOGY

Precise BioMatch™ is the core of our technology, and is presented in various toolkits for specialized solution integration and offered as runtime modules for client applications. Precise BioMatch™ is available in various implementation formats to support different standards and modalities to best fit the end-customers' needs.

With Precise Match-on-Card™, we combine the best authentication methods; smart cards and Precise BioMatch™ fingerprint recognition. By both storing and matching the fingerprint template on the card, the biometrics does not only act as pure PIN replacement; it creates a proven identity. The use of the fingerprint to unlock the card becomes an integral part of the smart card and makes use of the secure environment of the chip. This offers both increased security and preserved user integrity.

The Company

Precise Biometrics is an innovative Swedish company with global presence, offering technology and expertise for fingerprint recognition to prove people's identities. Our end-customer references are countries and government agencies, large global corporations, as well as local businesses.
